DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to camera, system detail and wireless communication, classified in class 348, subclasses 207.99 and 211.2.
- II. Claims 18-26, drawn to data processing: financial, business practice, management or cost/price determination and remote ordering, classified in class 705, subclasses 26 and 27.

The inventions are distinct, each from the other because of the following reasons:

The invention I does not require providing hardcopy of image data; receiving, at a photo processing establishment, customer identification information from a location-based services provider; receiving, at photo processing establishment, image data from a location-based services provider; printing the image data; billing the charges associated with printing the image data to the location-based services provider or to a credit card account, and shipping the printed image data to a pre-determined address as required in the invention II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
